

Three fresh calls per condition; lines join means; small points and bars show draws and their range

Three fresh calls per condition; lines join means; small points and bars show draws and their range

Will Austin reach a maximum of 98–99°F on September 19?

Will Dune: Part Three be delayed past December 18?

Dashed line: opening midpoint, sealed before research. Bars are observed ranges, not confidence intervals. Annotations score the mean forecast; the primary table averages losses across calls within each question. Question-only and research calls are separate; replicate numbers do not imply matched random draws.
